WEDGE WIRE FILTER ELEMENT

SINFT® Wedge Wire Filter Elements

Water Treatment Field: such as boiler water, petrochemical water, papermaking water, ship ballast water and other primary filters with relatively large flow rates and pressure differences.

1. Filter water cap: It is installed at the bottom of the sand filter tank and mixed bed to filter solid particles with a precision above 20 microns (0.02mm).

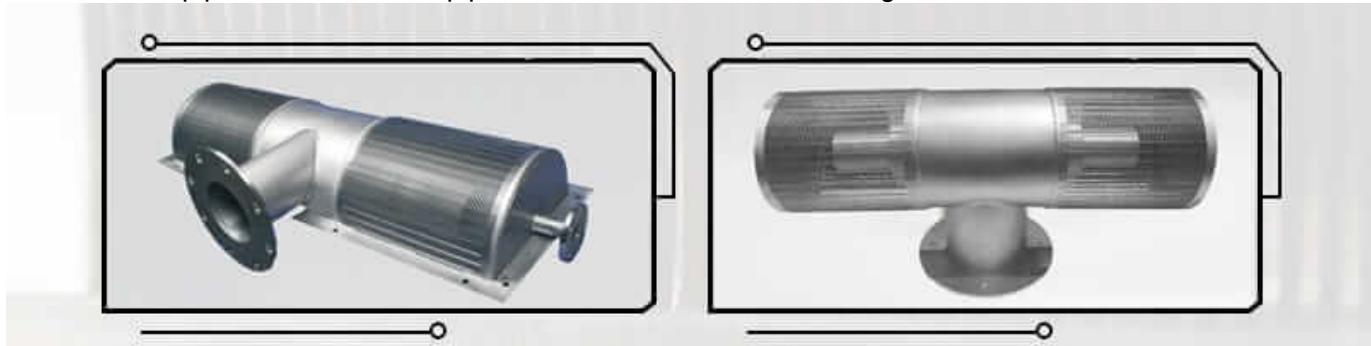

2. Middle row pipe water distributor: installed on the mixed bed, filtering solid particles with a precision above 20 microns (0.02mm).

3. Resin trap: installed at the bottom of the sand filter tank or mixed bed to capture the leaked gravel to prevent pollution to downstream water quality.

4.Water well pipe: installed on the pipe well to filter out the surrounding sediment.

5.Water intake filter cartridge: Generally installed in the water intake of sea water purification, the filtration accuracy is not high.

Curved Screen: It is mainly installed on the curved screen and is the main filter component of the screen.

Flow direction: FOIT

Roller Screen: Installed on the roller screen machine, relying on the motor to drive the blades inside the screen cylinder to squeeze the filter to achieve solid-liquid separation.

Centrifuge Sieve blue: installed on the centrifugal sieve machine, the sieve basket runs at high speed to realize the separation of solid particles.

Support Grille: installed at the bottom of the tank to support and filter.

High Pressure, High Strength, Cleanable

SINFT® wedge wire filter elements are ideal for many challenging filtration applications. Their design provides:

- Minimal plugging and blinding
- Corrosive application suitability
- Optimum structural strength for heavy loads
- High pressure/pulsating pressure capability
- Long-life — almost endless cleanability
- Sterile application / food industry suitability

- Thermal resistance
- Low pressure drop
- High flow rate

High Performance Filtration for Many Applications

If your production involves any aspect of fluid/solid separation, the products and experience that we have can help you achieve the most efficiency and effectiveness.

- Filtration
- Separation
- Straining

Industries That Can Benefit From Wedge Wire Filtration

- Pulp and paper
- Chemical
- Petrochemical
- Automotive
- Mineral and aggregate processing
- Plastics extrusion
- Adhesive/sealant filtration
- Coatings
- Other highly viscous fluids in many industries
